Director, Project Management Division

U.S. Department of Energy, Rocky Flats Project Office

10808 Highway 93, Unit A

Golden, CO 80403-8200

**RE: Building 440 notification of intent to invoke the Facility Component Removal, Size Reduction, and Decontamination Activities RSOP (Component RSOP) - concurrence**

Dear Mr. Legare:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has received your May 12, 2005 letter notifying us of your intent to utilize the Component RSOP for disconnection, removal, and packaging of equipment, and decontamination of building surfaces within B440. We are hereby concurring that this activity may proceed utilizing the Component RSOP.

It is also stated in your letter that you would like our concurrence with the six-point analysis. However, a six-point analysis was not provided, nor was there any indication for a need for the six-point analysis to have been provided with this Notification. Since it is stated that the proposed activity will not involve any breach or removal of contaminated portions of the building shell of B440, we see no need for a six-point analysis (per Component RSOP, Section 3.8.1) to be provided. However, if this or other proposed activity will breach the building shell, of B440 Westside, then a six-point analysis will need to be submitted.

If you have any questions regarding this correspondence please contact me at (303) 692-3367 or David Kruchek at (303) 692-3328.

Sincerely,

Steven H. Gunderson  
RFCA Project Coordinator
